CLAIM

I claim the ornamental design for an arthroplasty jig blank, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of a left femoral jig blank of an arthroplasty jig blank according to a first variant of the present design;

FIG. 2 is a rear perspective view of the left femoral jig blank of FIG. 1;

FIG. 3 is a front view elevational of the left femoral jig blank of FIG. 1;

FIG. 4 is a rear elevational view of the left femoral jig blank of FIG. 1;

FIG. 5 is a top plan view of the left femoral jig blank of FIG. 1;

FIG. 6 is a bottom plan view of the left femoral jig blank of FIG. 1;

FIG. 7 is a right side elevational view of the left femoral jig blank of FIG. 1;

FIG. 8 is a rear left side elevational view of the left femoral jig blank of FIG. 1;

FIG. 9 is bottom perspective view of the left femoral jig blank of FIG. 1;

FIG. 10 is a right side, front perspective view of the left femoral jig blank of FIG. 1;

FIG. 11 is a front elevational view of a right femoral jig blank according to a second variant of an arthroplasty jig blank, which is a mirror image of the of the left femoral jig blank of FIG. 1;

FIG. 12 is a front perspective view of the left femoral jig blank according to a third variant of an arthroplasty jig blank;

FIG. 13 is a rear perspective view of the left femoral jig blank of FIG. 12;

FIG. 14 is a front elevational view of the left femoral jig blank of FIG. 12;

FIG. 15 is a rear elevational view of the left femoral jig blank of FIG. 12;

FIG. 16 is a top plan view of the left femoral jig blank of FIG. 12;

FIG. 17 is a bottom plan view of the left femoral jig blank of FIG. 12;

FIG. 18 is a right side elevational view of the left femoral jig blank of FIG. 12;

FIG. 19 is a left side elevational view of the left femoral jig blank of FIG. 12; and,

FIG. 20 is a top plan view of a right femoral jig blank according to the fourth variant of an arthroplasty jig blank, which is a mirror image of the left femoral jig blank of FIG. 12.
