(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a first image of the display screen with transitional graphical user interface in accordance with the present invention;

FIG. 2 is a second image of the display screen with transitional graphical user interface depicted in FIG. 1;

FIG. 3 is a third image of the display screen with transitional graphical user interface depicted in FIG. 1;

FIG. 4 is a fourth image of the display screen with transitional graphical user interface depicted in FIG. 1; and,

FIG. 5 is a fifth image of the display screen with transitional graphical user interface depicted in FIG. 1.

The broken lines illustrate the display screen and foam no part of the claimed design.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-5. The process or period in which one image transitions to another forms no part of the claimed design.
