UNITED STATES PATENT OFFICE.

ALEXANDRA GRÄFIN v. DYHRN, OF BRESLAU, GERMANY.

PACKAGE.

992,645.

Specification of Letters Patent.

Patented May 16, 1911.

Application filed August 7, 1907. Serial No. 387,498.

To all whom it may concern:

Be it known that I, ALEXANDRA GRÄFIN VON DYHRN, a subject of the King of Prussia and German Emperor, residing at Kaiser Wilhelmstrasse, Breslau, in the Province of Silesia and Empire of Germany, have invented a new and useful Improvement in Packages, of which the following is a specification.

10 The present invention refers to an improvement in packages, and consists in inserting between two post cards small plates suitably wrapped up, and consisting of a thin piece of material such as chocolate
15 chips, wafers or similar confectionery.

In the accompanying drawing such a package is illustrated.

20 Figure 1 is a sectional view of applicant's improved package. Fig. 2 is a front elevation of the package with parts broken away to show the wrapper.

25 In the drawing the cards *a* and *b* may consist of two post cards, one of which has one side arranged for the address, and on the other there may be a view of a monument, a renowned person or the like. The two cards are joined by a fold *d*. Between the cards, there is inserted a thin piece *c*

of chocolate, a wafer, or similar confectionery, suitably inclosed in a wrapper *e*. 30

The cards *a* and *b* are secured by an adhesive substance or paste to the wrapper *e*. It will be noted that the fold *d* gives the completed package the appearance of a book.
Claim. 35

A package consisting of a thin layer of confection provided with a protecting wrapper entirely surrounding the same, a post card, having an address side secured by an adhesive at one side of said layer to the wrapper thereof, a card having a view thereon secured by an adhesive at the other side of said layer to the said wrapper, said cards being arranged in such a manner that the view and the address side shall be on the surface of the package, said cards being connected by a fold of material at one side of said package along their longitudinal adjacent edges whereby the package is given the appearance of a book. 50

In testimony whereof I have hereunto set my hand in the presence of two witnesses.

ALEXANDRA GRÄFIN v. DYHRN.
