(54) Title: ELECTRONIC PRIZE GAMING APPARATUS

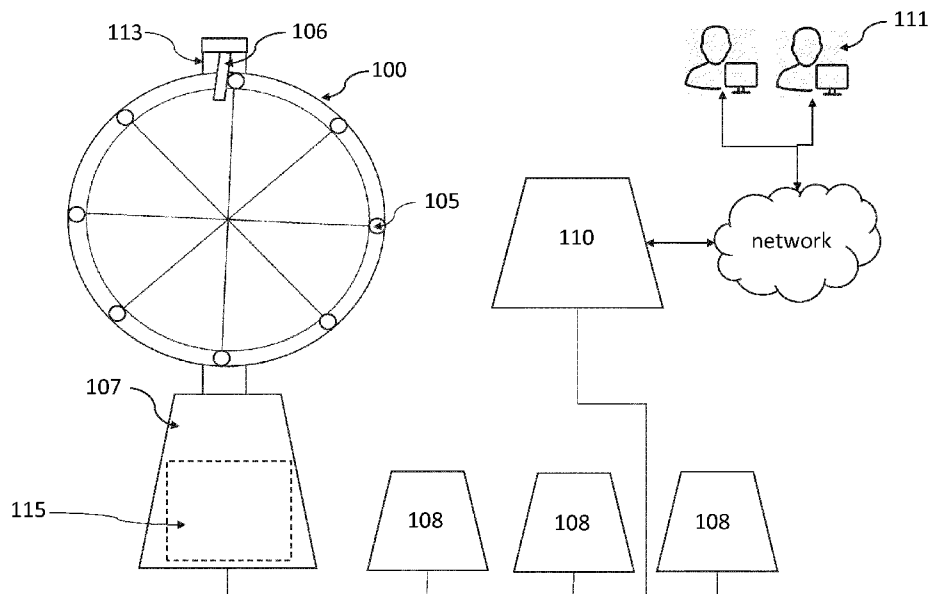

Figure 3

WO 2019/197385 A8

(57) Abstract: The present invention discloses a gaming apparatus comprising: a digital screen display (100) mounted on a support (113, an actuation mechanism (104, 105, 112) arranged for moving the digital screen display around an axis of rotation (120), at least one position identification member (106), a position sensing mechanism (103) arranged for at least detecting the position of the prize segments (101) with respect to the at least one position identification member (106); and a computer system (115). The computer system arranged for transmitting the electronic prize game digital image and associated prize information for display on the digital screen display (100), and for detecting, based on the position information obtained from the position sensing mechanism (103), at least one prize segment (101) associated with the at least one stopping position of the digital display screen (100).
