(54) Title: METHOD AND SYSTEM FOR OFF-LINE PROGRAMMING OF MULTIPLE INTERACTING ROBOTS

(57) Abstract: A method and apparatus are disclosed for off-line programming of multiple interacting robots. For example, a system for off-line programming (100) of multiple interacting robots includes a computer (110) for off-line programming and verification of program codes (111) for multiple interacting robots (131-133) and a robot controller (120) connected to the computer (110) to receive a download of at least one of the program codes for execution. Multiple interacting robots (131-133) can be controlled by the robot controller (120).

* Special categories of cited documents :

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *&* document member of the same patent family
