R. H. STRIPE

GOLF BAG CARRIER

Filed March 12, 1925

Inventor:
Reuben H. Stripe,
by Robert A. Cummings Atty.

UNITED STATES PATENT OFFICE.

REUBEN H. STRIPE, OF WAUKEGAN, ILLINOIS.

GOLF-BAG CARRIER.

Application filed March 12, 1925. Serial No. 14,863.

To all whom it may concern:

Be it known that I, REUBEN H. STRIPE, a citizen of the United States of America, residing at Waukegan, in the county of Lake and State of Illinois, have invented a certain new and useful Improvement in Golf-Bag Carriers, of which the following is a specification.

This invention relates to means for supporting and transporting golf bags and their contents from place to place during the progress of the game, in an easy and convenient manner. And the present improvement has for its object:—

To provide a structural formation and combination of parts in a wheeled carrier adapted to hold and support a golf bag in a readily portable and accessible manner, all as will hereinafter more fully appear.

In the accompanying drawing:

Fig. 1 is side elevation, illustrating the general arrangement of parts in the invention.

Fig. 2 is a detail longitudinal section of the lower part of the appliance.

Fig. 3 is a transverse section on line 3—3, Fig. 1.

Like reference numerals indicate like parts in the several views.

The present appliance comprises a base 1 of a cup shape adapted to receive the rigid bottom piece of a golf bag and by means of a marginal rim on said base hold the bag from lateral displacement in actual use.

On the under face of the base 1 is fixedly arranged a hanger bracket carrying an axle 3 at the respective ends of which are mounted ground wheels 4, affording ready portability.

At one end the base 1 is formed with a socket portion 5 for the fixed attachment of a pole or handle 6, of the required length and with its upper or free end provided with a hand grip 7 by which the appliance is drawn over the field by the player or caddy.

Intermediate the length of the pole or handle 6 is secured a curved spring clip 8 adapted to encircle and hold an upper portion of the golf bag in proper position on the carrier, and in like manner a hinged prop rail 9 is attached to the pole 6, for supporting the carrier and golf bag in an accessible inclined position as shown.

Having thus fully described my invention what I claim and desire to secure by Letters Patent is:—

A golf bag carrier, comprising a base having a raised marginal rim and a socket at one point of said rim, a pole or handle fixed in said socket, a bag engaging clip arranged intermediate the length of said pole, and a pair of ground wheels the carrying axle of which is mounted on the base.

Signed at Chicago, Illinois, this 10th day of March, 1925.

REUBEN H. STRIPE.
