(54) Title: MODULAR PET ENCLOSURE AND KITS THEREOF

Figure 1

(57) Abstract: A modular pet enclosure having interchangeable and configurable wall panels of varying size is provided. The tunnel connection panel can be placed in multiple different configurations and orientations. An open-ended tunnel that can be removably attached to the modular pet enclosure and a dwelling, including all known pet doors, is used for the pet to move between the dwelling and the enclosure.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
