CLAIM

The ornamental design for a display panel with graphical user interface for analyzing and presenting supply, fabrication and logistics data, as shown and described.

DESCRIPTION

FIG. 1 depicts a display panel with graphical user interface for analyzing and presenting supply, fabrication and logistics data in a first image.

FIG. 2 depicts a display panel with graphical user interface for analyzing and presenting supply, fabrication and logistics data in a second image.

FIG. 3 depicts a display panel with graphical user interface for analyzing and presenting supply, fabrication and logistics data in a third image.

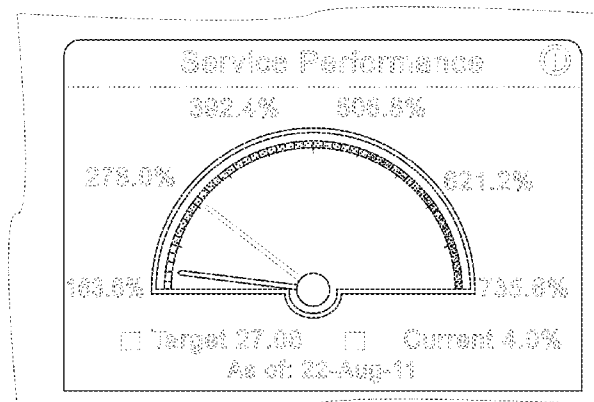

FIG. 4 depicts a display panel with graphical user interface for analyzing and presenting supply, fabrication and logistics data in a fourth image; and,

FIG. 5 depicts a display panel with graphical user interface for analyzing and presenting supply, fabrication and logistics data in a fifth image.

The appearance of the display panel with graphical user interface for analyzing and presenting supply, fabrication and logistics data changes sequentially in a process or period between the images shown in FIGS. 1-5. This process or image forms no part of the claimed design.

The broken lines in the drawings represent portions of the graphical user interface and the display panel that form no part of the claimed design.
