(54) Title: FAST ACTION BACCARAT

**FIGURE 1**

(57) Abstract: A gaming station that includes a plurality of player gaming units is provided. Each player gaming unit may include a betting area on a surface of a trapdoor. Such a trapdoor may support one or more chips in the betting area when the trapdoor is closed. When the trapdoor opens, the chips fall into an internal chip collection area. The player gaming unit may further include an adjustable screen. When the screen is in the closed position, the screen serves to block a player at the player gaming unit from accessing the betting area. When the screen is in the open position, the player is allowed to access the betting area. The gaming station may further include a sliding float for holding a plurality of chips. Such a sliding float may be movable past the plurality of player stations.
