James M. Garnett. County of Essex Virginia

Letters Patent.

The schedule referred to in these Letters Patent and making part of the same, containing a description in the words of the said James M. Garnett, himself of his improvement in the Cultivator

To all to whom these presents shall come

Be it known that I James M. Garnett in the County of Essex and State of Virginia, have invented a new and useful improvement in the ~~a~~, or Eschalon cultivator, & that the following is an full and exact description thereof.

The construction of a curved cast iron, marked No 3 in the accompanying drawings, having in the underside 2 dovetail grooves which the wrought iron marked No 4 is made to fit, so that when one point wears out the other may be turned. Four of these are fixed in a bar of wood fastened diagonally at an angle of 45°, to a straight beam of the length and size of a common plough beam for a single horse.

What I claim as my own invention is the form and fixing of the cast iron No 3.
