WILLIAM H. DODSEN, JR., OF SAN ANTONIO, TEXAS, ASSIGNOR TO F. F. COLLINS MANUFACTURING COMPANY, OF SAME PLACE.

DESIGN FOR A GRINDING-MILL CASING.

SPECIFICATION forming part of Design No. 34,485, dated May 7, 1901.

Application filed May 16, 1900. Serial No. 16,636. Term of patent 7 years.

To all whom it may concern:

Be it known that I, WILLIAM H. DODSEN, Jr., a citizen of the United States, residing at San Antonio, in the county of Bexar and State of Texas, have invented and produced a new and original Design for a Grinding-Mill Casing, of which the following is a specification, reference being had to the accompanying drawings, forming a part thereof.

Figure 1 is a perspective view showing a rear elevation of the mill-casing. Fig. 2 is a perspective view showing a front elevation of the mill-casing. Fig. 3 is a top plan view of the mill-casing.

As shown in the drawings, the leading feature of my design is a grinding-mill casing composed of a rectangular body portion designed for holding the grinding-stones, and an oblong V-shaped hopper B, designed to hold the screw-feed. C denotes a base upon which the body portion is supported. c denotes an extension of said base which is designed as a support for the driving-pulleys which operate the grinding-stones.

Having thus described my invention, what I claim as new, and desire to secure by Letters Patent, is—

The design for a grinding-mill casing as herein shown and described.

In testimony whereof I affix my signature in presence of two witnesses.

WILLIAM H. DODSEN, JR.
