(54) Title: SYSTEM AND METHOD FOR USING A HAPTIC DEVICE IN COMBINATION WITH A COMPUTER-ASSISTED SURGERY SYSTEM

(57) Abstract: The use of a haptic device with a computer-assisted surgery system is disclosed. One aspect generally pertains to use of robotic devices, preferably haptic devices, as input devices, allowing information to pass from the user to a computer-assisted surgery system. In another aspect, the combination of the haptic device and the computer-assisted surgery system may be used for intra-operative haptic planning of a medical procedure. In another aspect, the combination of the haptic device and the computerassisted surgery system may be used for haptic sculpting of physical objects. In yet another aspect, the combination of the haptic device and the computer-assisted surgery system may be used for interactive haptic positioning of the haptic device.

Continuation of Box I.2

Claims Nos.: 24-47,83-103,110-118,177-198

Present claims 24-47,83-103,110-118,177-198 relate to an extremely large number of possible apparati, because of the vague wording and/or of the combination in the same claims of features describing a device and features describing a method. In fact, the claims contain so many options, variables, possible permutations and provisos that a lack of clarity (and conciseness, see below) within the meaning of Article 6 PCT arises to such an extent as to render a meaningful search of the claims impossible. Consequently, the search has been carried out for those parts of the application which do appear to be clear, namely claims 104 to 109 and 119 to 125.

Furthermore, the large number of the claims presently on file render it difficult, if not impossible, to determine the matter for which protection is sought. Therefore, the present application fails to comply with the clarity and conciseness requirements of Article 6 PCT (see also Rule 6.1(a) PCT).

The applicant's attention is drawn to the fact that claims, or parts of claims, relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure.

International application No. PCT/US 03/07063

Box I	Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)				
This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:					
1. χ	Claims Nos.: 1-23,48-68,69-77,78-82,126-154,155-176 because they relate to subject matter not required to be searched by this Authority, namely:				
	Rule 39.1(iv) PCT - Method for treatment of the human or animal body by surgery				
	Claims Nos.: 24–47,83–103,110–118,177–198 because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:				
	see FURTHER INFORMATION sheet PCT/ISA/210				
	Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).				
Box II	Observations where unity of invention is lacking (Continuation of item 2 of first sheet)				
This Inter	rnational Searching Authority found multiple inventions in this international application, as follows:				
1.	As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.				
2.	As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.				
3.	As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:				
4.	No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:				
Remark (on Protest The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.
