(57) Abstract:

A holder (1) for objects (29), comprising a bracket (2) and a holder element (3) supported by the bracket, where the holder element comprises a resilient gripping section (9) and two stiff pivoting arms (10, 11), where the pivoting arms are pivotably suspended to the bracket (2), where the holder element (3) comprises a receiving position (27) and a holding position (28) in which the object (29) is held by the holder element (3), such that the gripping section (9) is positioned within the bracket (2). The advantage of the holder is that objects of different sizes can be held in a secure way.
