(54) **Combined cutting and grinding tool**

(57) The invention relates to an arrangement in connection with a tool, to be used for instance in an angle grinder. The arrangement comprises a spindle (2) rotated by a drive unit, a standard wheel (1) being arranged to the spindle by means of a spindle nut (4). To the spindle (2) is also arranged a separate grinding member smaller than the standard wheel (1), the grind-

ing member having a grinding surface on its outer periphery. The arrangement can be used for instance in plumbing: the standard wheel (1) can be used for cutting the pipes and the grinding member for grinding the flash from the cutting point.
