UNITED STATES PATENT OFFICE.

EDSON S. JONES, OF PROVIDENCE, RHODE ISLAND, ASSIGNOR TO THE
PROVIDENCE TOOL COMPANY, OF SAME PLACE.

DESIGN FOR LEG-FRAMES OF SEWING-MACHINES.

Specification forming part of Design No. **10,829**, dated September 17, 1878; application filed August 25, 1876.
[Term of patent 14 years.]

To all whom it may concern:

Be it known that I, EDSON S. JONES, of the city and county of Providence, and State of Rhode Island, have invented a new and useful Design for a Sewing-Machine Leg; and I do hereby declare that the following specification, taken in connection with the drawing making a part of the same, is a full, clear, and exact description thereof.

The general outline of the leg herein described is that of a harp, having a scroll-base, A, upon which rests the body or belly B. This body is in the form of a circle, and from it arise converging arms C C', which terminate in scrolls D D', the said arms being connected at their tops by a head-piece, E, which furnishes a bed for the wood table-top placed thereon. An upright dart-shaped bar, F, rises centrally from the body B, and is intersected by a cross-bar, G, which connects the arms C

C', the said bars being ornamented at their intersection by a rosette, a. A distinctive feature is given to the design by introducing into the circular body B a panel or frame, H, which incloses the word "Household," as shown, although any other word, as a name applied to the machine, may be used.

What I claim is—

The design for a sewing-machine leg, consisting of a scroll-base, A, circular body B, converging arms C C', terminating in scrolls D D', head-piece E, bars F and G, and frame H, inclosing the word "Household," or other word or words, the whole producing the ornamental effect substantially as shown and represented in the drawing.

EDSON S. JONES.
