The method of producing a split outer shell cradle mount with rate plates involves placing at least one insert and a rate plate in a mold. The mold is then formed around the at least one insert and the at least one rate plate.

**Abstract:**
A cradle mount assembly for use in a vehicle is provided including at least two inserts having at least two rate plates connected to each respective insert. The rate plates are connected to the inserts by means of a connection or structural portion. A mold provided to mold plastic, polymer or other suitable material around the at least one insert and the at least one rate plate. The mold having structure capable of accepting the connection or structural portion connecting the at least one rate plate to the at least one insert. A method is further provided for the molding process including the steps of connecting the at least one insert and the at least one rate plate to the mold by means of the connection or structural portion. The mold is then formed around the at least one insert and the at least one rate plate.

INTERNATIONAL SEARCH REPORT

A. CLASSIFICATION OF SUBJECT MATTER

B60K 5/12(2006.01)i, B60K 5/00(2006.01)i

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
B60K 5/12; B29C 33/12; B29C 45/36; F16F 13/14

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched
Korean utility models and applications for utility models
Japanese utility models and applications for utility models

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)
eKOMPASS(KIPO internal) & Keywords: insert, rate, plate

Further documents are listed in the continuation of Box C. See patent family annex.

* Special categories of cited documents:
"A" document defining the general state of the art which is not considered to be of particular relevance
"E" earlier application or patent but published on or after the international filing date
"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)
"O" document referring to oral disclosure, use, exhibition or other means
"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
"&" document member of the same patent family
