54 **Device and method for conveying articles of clothing.**

57 The device to hold and hang suits, particularly trousers, and to maintain them ironed in any type of travelling bag, even in small soft bags, comprises at least two, preferably rectangular, frames (T₁, T₂) of metallic wire, the long inner sides (CLS1, CLS2) of which are both hinged in one central sleeve (HS). Each outer long side of said frames is formed of overlapping portions (V1-V1') of wire and is inserted in a separate sleeve. A third frame (T₃) with a top hook (G) can be also hinged in said central sleeve. The device can be inserted into an envelope-like container (PC).
