(54) Title: EMERGENCY AND LOW-LIGHTING SYSTEM

(57) Abstract: A new lighting system (40) is disclosed that may be used as an emergency lighting system, a night lighting system, and as a security lighting system. The lighting system includes a plurality of lights (44) that are installed in a building. These lights (44) are attached to low-voltages wires(48b). In turn, the wires (48) are attached to a control unit (54) which includes timers and a controller (120). The controller (12Q) is designed such that it may turn individual lights on and off at specified times during the day. Likewise, the system in constructed such that in the event of a power outage or other emergency, lights in the system will turn on and indicating to the building occupants where the building exits are located.
