(54) **Distribution manifold for thermal system with forced circulation**

(57) A distribution manifold for forced circulation heating system, of the type being used in heating systems providing a plurality of manifolds (11; 41), each one associated to a different set of heating elements, said manifold (11; 41) being associated through relevant duct and housing elements (17; 47; 75; 85) to valve means

(23, 32; 72) apt to put the manifold (11; 41) in communication with the heating system. According to the invention, said distribution manifold (41) is incorporated in a one-piece monoblock (40, 80), also incorporating the duct and housing elements (47;85), which associate said valve means (23, 32; 72)

**ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.**

EP 00 11 2477

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on  
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
