Title: BIOSYNOCHRONOUS TRANSDERMAL DRUG DELIVERY

Abstract: A delivery mechanism and device for the passive periodic release of a drug or an active ingredient and the methods for synchronizing the administration of compounds with the human body's natural circadian rhythms and addiction rhythms. This strategy is intended to counteract disease states and symptoms when they are likely to be at their worst by using an automated and pre-programmable transdermal or other drug administration system.
INTERNATIONAL SEARCH REPORT

A. CLASSIFICATION OF SUBJECT MATTER
IPC: A61F 13/00 (2006.01); A61N 1/30 (2006.01)

USPC: 424/449; 604/20
According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
U.S.: 424/449; 604/20

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)
Please See Continuation Sheet

C. DOCUMENTS CONSIDERED TO BE RELEVANT

<table>
