Other: Korean utility models and applications for utility models; Japanese utility models and applications for utility models; eKOMPASS (KIPO internal)

(54) Title of the Invention: **Content encryption to produce multiply encrypted content**
Abstract Title: **Content encryption to produce multiply encrypted content**

(57) Examples herein disclose receiving encrypted content encrypted with a first key. The examples disclose receiving a second key associated with the encrypted content, wherein the second key is a different encryption key from the first key. Additionally, the examples disclose encrypting the encrypted content with the second key to produce multiply encrypted content.
