(54) Title: METHOD FOR ELECTRIC GENERATION BY USING FLUID CHANNELLING VIA SEQUENTIAL SIPHONING TECHNIQUE AND DEVICE USING THE SAME

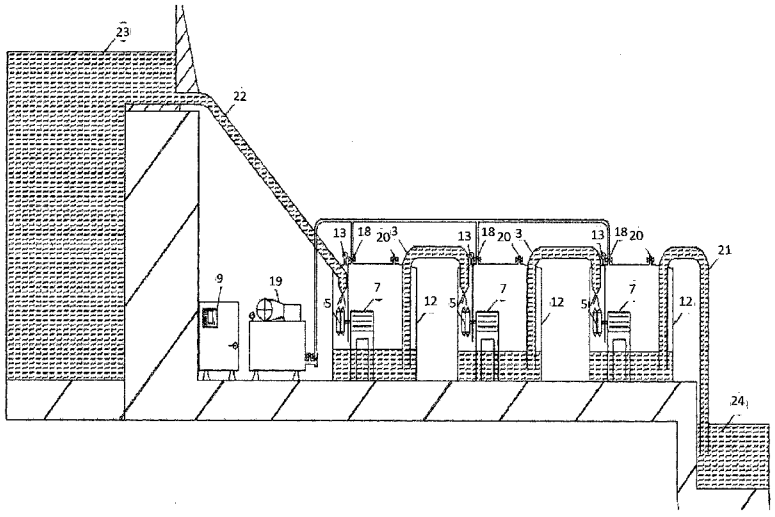

Figure-6

(57) Abstract: The invention relates to a machine wherein declining inner atmospheric pressure differences are create by establishing sequential siphon connection between adjacent air tight pressurised chambers, fluid in said chambers is moved from one chamber to another with decreasing pressure and sprayed onto impulse turbines with wheels (Pelton, Turgo or Michell-Banki) to generate torque and this force is transformed into electricity.

A. CLASSIFICATION OF SUBJECT MATTER
INV. F01K27/00 F03B13/06 F03B13/08
ADD.

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
F01K F03B

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)
EPO-Internal

* Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
