The invention relates to suppository packaging which comprises a package (3, 4) and a suppository (1) arranged in a chamber of said package (3, 4). In addition to the suppository, a lubricant (2) is placed inside the package.
SUPPOSITORY PACKAGING DEVICE

CROSS-REFERENCE TO RELATED APPLICATIONS

[0001] This is a National Stage Application of International Patent Application No. PCT/DE 2003/003229, with an international filing date of Sep. 27, 2003, which is based on German Patent Application No. 102 46 003.5, filed Oct. 2, 2002. The contents of both of these specifications are incorporated herein by reference.

BACKGROUND OF THE INVENTION

[0002] 1. Field of the Invention
[0003] The invention relates to a suppository packaging device comprising a package and a suppository arranged in a chamber of the package, such as, for example, a rectal suppository.

[0004] 2. Description of Related Art
[0005] Suppositories are dry; inserting them without a lubricant is difficult. The anus may be irritated. One therefore often uses creams, which are not suitable for this purpose (fragrances etc.) and are not always available.

[0006] Based on this, the object of the present invention is to provide an improved suppository package with suppositories that can be inserted more easily.

BRIEF DESCRIPTION OF THE DRAWINGS

[0007] The exemplary embodiments will be described in the following figures:
[0008] FIG. 1 is a suppository package in which the suppository (1) and the lubricant (2) are both stored in the same chamber.
[0009] FIG. 2 is a suppository package in which the suppository (1) and the lubricant (2) are stored in different chambers of the package.

DETAILED DESCRIPTION OF THE INVENTION

[0010] According to the invention, this object is achieved by providing, in the same package, both the suppositories and the lubricant.
[0011] In a first exemplary embodiment, as shown in FIG. 1, the lubricant can be stored together with the suppository in a chamber inside the package. In FIG. 1 the suppository was given the reference sign 1 was given, the lubricant enveloping the suppository was given the reference sign 2, and the package providing the chamber for both the suppository 1 and the lubricant 2 was given the reference sign 3.
[0012] In the second exemplary embodiment, shown in FIG. 2, in which identical components were given the same reference signs as in FIG. 1, the suppository 1 and the lubricant 2 are located in different chambers provided by a package 4. In this fashion, the suppository is not impaired by the lubricant. In this case, the chamber for the lubricant 2 is opened simultaneously with the chamber for the suppository 1.

What is claimed is:

1. A suppository package comprising a package (3, 4) and a suppository (1) arranged in a chamber of the package (3, 4), characterized in that the package, in addition to the suppository, also contains a lubricant (2).

2. The suppository package according to claim 1, characterized in that both the suppository (1) and the lubricant (2) are arranged in a common chamber of the package (3).

3. The suppository package according to claim 1, characterized in that the suppository (1) and the lubricant (2) are arranged in different chambers of the package (4).

4. The suppository package according to claim 1, characterized in that the lubricant is a greasy cream or vaseline.

5. The suppository package according to claim 1, characterized in that the suppository (1) is a rectal suppository.

6. The suppository package according to claim 2, characterized in that the lubricant is a greasy cream or vaseline.

7. The suppository package according to claim 3, characterized in that the lubricant is a greasy cream or vaseline.

8. The suppository package according to claim 2, characterized in that the suppository (1) is a rectal suppository.

9. The suppository package according to claim 3, characterized in that the suppository (1) is a rectal suppository.

10. The suppository package according to claim 4, characterized in that the suppository (1) is a rectal suppository.

11. The suppository package according to claim 1 wherein said lubricant allows for said suppository to be inserted more easily into the anus.

12. The suppository package according to claim 2, wherein said suppository is not impaired by the lubricant.

13. The suppository package according to claim 3, wherein said different chambers of the package are opened simultaneously.

14. A package for suppositories comprising a chamber, said chamber containing a suppository and a lubricant.

15. The package of claim 14, characterized in that said lubricant is a greasy cream or vaseline.

16. The package of claim 14, characterized in that said suppository is a rectal suppository.

17. A package for suppositories comprising two chambers, one said chamber for a suppository and a second said chamber for a lubricant.

18. The package of claim 17, characterized in that said lubricant is a greasy cream or vaseline.

19. The package of claim 17, characterized in that said suppository is a rectal suppository.

20. The package of claim 17, wherein said two chambers are opened simultaneously.
