(54) Title: USER INTERFACE FOR REMOTELY CONTROLLING A DIGITAL MUSIC PLAYER

(57) Abstract: Methods and systems for remotely controlling operation of a digital media player are described herein. A wristwatch or other alternatively purposed device may incorporate a transceiver for communicating with a digital media player. A user may interact with the wristwatch using a plurality of buttons disposed about a housing of the watch, through which the user may adjust a volume level of the digital media player, navigate audio playback, power the digital media player on and off, request playback of a song previously identified by the user, and adjust settings of the wristwatch. The wristwatch and/or the digital media player may be in communication with a biological performance measurement device, and the user, via the wristwatch, may request playback of a biological performance measurement recorded by the biological performance measurement device.

* Special categories of cited documents :

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *G* document member of the same patent family
