(54) **Stove with built-in boiler for hot water production**

(57) The present invention relates to a stove with built-in boiler for hot water production, which comprises a fire-box in which comburent air flows also when the mouth used to load wood is closed by the door, thanks to a series of intake openings that can be obstructed from the inside by means of a collapsible intercepting screen actuated by an electric engine controlled by a thermostat that closes the openings when hot water reaches the temperature set on the thermostat.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 04 42 5159

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
