Title: FORMING SPECTRAL FILTERS FOR ANAGLYPH GLASSES

Abstract: A lens bears a plurality of roll-coated layers to pass, to one eye of a viewer, a first image, in a first band of wavelengths, that is appropriate for 3D viewing of a stereoscopic image.
### INTERNATIONAL SEARCH REPORT

**International application No.**

PCT/US2007/065937

#### SUBJECT MATTER

*INV. H04N1/400*

According to International Patent Classification (IPC) or the both national classification and IPC.

#### RELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

**H04N G02B**

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched.

Electronic database consulted during the international search (name of data base and where practical search terms used)

**EPO-Internal, INSPEC**

#### DOCUMENTS CONSIDERED TO BE RELEVANT

<table>
<thead>
<tr>
<th>Category</th>
<th>Citation of document with indication where appropriate of the relevant passages</th>
<th>Relevant to claim No</th>
</tr>
</thead>
</table>

#### Additional Information

- Special categories of cited documents
  - 'A' document defining the general state of the art which is not considered to be of particular relevance
  - 'E' earlier document but published on or after the international filing date
  - 'L' document which may throw doubts on the patentability of the claimed invention
  - 'O' document referring to an oral disclosure, use, exhibition or other means
  - 'P' document published prior to the international filing date but later than the priority date claimed

- **'T'** later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

- **'X'** document of particular relevance to the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

- **'Y'** document of particular relevance to the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other documents such combination being obvious to a person skilled in the art

- **'E'** document member of the same patent family

- Date of the actual completion of the international search: 12 February 2008

- Date of mailing of the international search report: 22/02/2008

- Name and mailing address of the ISA/ European Patent Office, P B 5818 Patentlaan 2 NL - 2280 HV Rijswijk Tel (+31-70) 340-2040 Te x 31 651 epo nl Fax (+31-70) 340-3016

- Authorized officer: Wahba, Alexander

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. [] Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:

2. [ ] Claims Nos.: because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

3. [ ] Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

This International Searching Authority found multiple inventions in this international application, as follows:

see additional sheet

1. [ ] As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.

2. [] As all searchable claims could be searched without effort justifying an additional fees, this Authority did not invite payment of additional fees.

3. [ ] As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:

4. [ ] No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-12, 14, 23-29

Reducing cross-talk in anaglyph glasses

2. claims: 13, 15-22

Preventing shifting of transmitted wavelengths in anaglyph glasses due to a changing angle of incidence of light
