Salomon Kaufmann

United States Patent Office.

SALOMON KAUFMANN, OF NEW YORK, N. Y., ASSIGNOR TO METROPOLITAN COLLAR COMPANY, OF SAME PLACE.

Letters Patent No. 104,853, dated June 28, 1870.

IMPROVED PAPER-COLLAR BOX.

The Schedule referred to in these Letters Patent and making part of the same

To all whom it may concern:

Be it known that I, SALOMON KAUFMANN, of the city and State of New York, have invented an Improvement in Paper-collar Boxes; and the following is declared to be a correct description of the same.

In the manufacture of paper collars it is usual to put them up in dozen packages in a paper box. These boxes and collars are sold together, and very frequently used by travelers and others that are often deprived of the conveniences of home in making their toilet, and paper collars generally can be put on much better by the aid of a looking-glass.

The nature of my said invention consists in the paper collar-box made with a mirror or looking-glass upon the lid thereof, the same being a new article of manufacture, and supplying a want often experienced of a looking-glass when adjusting the collar.

In the accompanying drawing—

Figure 1 is a perspective view, showing said collar-box and looking-glass, and

Figure 2 is a section of the said box.

The bottom, *a*, of the paper-collar box and the top, *b*, are of a shape somewhat like a horseshoe, with one side straight, or nearly so.

In the top of the said box a small looking-glass or mirror is attached, as at *c*. I prefer to cut a hole in the paper of which the said box-cover is made, and make use of an ornamental border, surrounding the glass, and secure the glass in place by a piece of paper pasted upon the inside of the lid or cover. The looking-glass may be either convex, concave, or flat.

My collar-box, made with a mirror or looking-glass inserted in the manner specified, is a new and useful article of manufacture, and, in consequence of one side of the box-lid being straight, or nearly so, the box-lid can be stood up on this edge with ease while the mirror is being made use of.

I claim as my invention—

The paper collar-box of the character specified, with a mirror or looking-glass inserted in the cover, as a new article of manufacture.

Signed by me this 3d day of May, A. D. 1870.

SALOMON KAUFMANN.
