(54) Title: ORAL FLUID SAMPLING DEVICE AND METHOD

(57) Abstract: A device for collecting an expectorated oral fluid specimen for testing comprises a collection chamber having a specimen reservoir space and a headspace, and a vent, and a hollow tube capable of conducting oral fluid from the oral fluid donor's mouth to the specimen reservoir space of the collection chamber. The headspace is for storing oral fluid foams and the vent is for air to escape the chamber when the oral fluid is being collected into the collection chamber. The tube and the collection chamber are either permanently connected or separate with the device having a connection mechanism allowing the connection of the two. The device may further comprise an assay reagent component for detecting an analyte of the oral fluid specimen. The device provides simple means for oral fluid collection and testing, and especially useful in point-of-collection testing of oral fluid specimens.
INTERNATIONAL SEARCH REPORT

A. CLASSIFICATION OF SUBJECT MATTER
   IPC: A61B 5/00(2006.01)
   USPC: 600/584
   According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED
   Minimum documentation searched (classification system followed by classification symbols)
   U.S. : 600/584, 582, 573, 576
   Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched
   Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

☐ Further documents are listed in the continuation of Box C. ☐ See patent family annex.

* Special categories of cited documents:
  "A" document defining the general state of the art which is not considered to be of particular relevance
  "E" earlier application or patent published on or after the international filing date
  "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
  "O" document referring to an oral disclosure, use, exhibition or other means
  "P" document published prior to the international filing date but later than the priority date claimed
  "Y" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
  "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
  "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
  "A" document member of the same patent family
