INVENTOR
UNITED STATES PATENT OFFICE.

BENAGE S. JOSSELYN, OF DENVER, COLORADO.

DESIGN FOR A SPOON.

SPECIFICATION forming part of Design No. 21,469, dated April 19, 1892.
Application filed March 8, 1892. Serial No. 424,231. Term of patent 3½ years.

To all whom it may concern:

Be it known that I, BENAGE STOCKWELL JOSSELYN, a citizen of the United States, residing at Denver, in the county of Arapahoe and State of Colorado, have invented and produced a new and original Design for Spoons, of which the following is a specification, reference being had to the accompanying drawing, showing the whole thereof.

The figure on the drawing represents a front or face view of spoon, this one view alone being deemed necessary to fully illustrate my design.

The leading feature of my design consists in raised-work surface, the outlines of which, when viewed in elevation, as in drawing, will represent various distinct figures.

A is the head of the spoon which represents a Passion cross, on the center of which is placed a Maltese cross, and in the center of Maltese cross is placed a keystone, the Maltese cross being pierced diagonally by two crossed swords, the lower leg of the Passion cross piercing a crown, all in raised or open work.

B is center of handle and represents a warrior's shield, on the side of which is placed diagonally a Passion cross, all in raised work.

C is bowl of spoon, upon which is the letter "C," within the circle of which is placed a crown, pierced diagonally by a Passion cross, and on the broad side of the letter "C" are the words "Grand Commandery, K. T., Colorado." Surrounding this design are the words "Silver Triennial Conclave, Denver, 1892," all in raised work. It is obvious, however, that such words and dates may be omitted, as not being of the essence of my design.

What I claim is—
The design for a spoon, herein shown and described.

BENAGE S. JOSSELYN.
