(54) Title: SYSTEM AND METHOD FOR DETERMINING APPROPRIATE CONTENT FOR AN EVENT CONTENT STREAM

FIG. 1

(57) **Abstract:** A computer-implemented method, computer program product, and computing system for determining appropriate content for an event content stream is provided. Embodiments may include defining, on one or more processors, an online collaborative space associated with an event. Embodiments may also include associating, on the one or more processors, a plurality of event participants with the event and receiving, on the one or more processors, content contributions from one or more of the event participants. Embodiments may also include determining if the received content contributions are associated with the event. If the received content contributions are associated with the event, embodiments may further include transmitting, on the one or more processors, an event content update to a client event application based on the received content contributions to provide a live stream of event content.
