UNITED STATES PATENT OFFICE.

AUGUST ROESELER, OF HUSTISFORD, WISCONSIN.

SHOW-RACK FOR FARMERS' IMPLEMENTS.

SPECIFICATION forming part of Letters Patent No. 341,693, dated May 11, 1886.

Application filed April 20, 1885. Serial No. 162,728. (No model.)

To all whom it may concern:

Be it known that I, AUGUST ROESELER, of Hustisford, in the county of Dodge, and in the State of Wisconsin, have invented certain new and useful Improvements in Show-Racks for Farmers' Implements; and I do hereby declare that the following is a full, clear, and exact description thereof.

My invention relates to racks for farmers' tools and other handled implements while on sale, and will be fully described hereinafter.

In the drawing the figure is a perspective view of my invention.

A are stands having suitable bases for supporting them in an upright position, and these stands are connected by an upper and lower bar, B and B′, respectively, from which are projected on either side hinge-staples *b*, upon which are swung brackets C, which latter consist each of a frame having cross-pieces *c*, perforated to receive the handles of the implements D D, and on the outer end of each bracket is a staple, *d*, for the handle of a pick or other short-handled implement. The brackets are hung loosely on their hinges, and may be easily lifted off and replaced; and they may be hung very close together, as they may be swung apart to give access between them.

Having thus fully described my invention, what I claim as new, and desire to secure by Letters Patent, is—

1. The combination, with the stands and their connecting-bars and hinged staples, of the swinging brackets having perforated cross-pieces, as and for the purpose set forth.

2. The combination, with the stands A, bars B B′, and their staples, of hinged brackets having perforated cross-bars and staples, as set forth.

3. In combination with the stationary stand A B B′, having hinge-staples *b b* on the connecting-bars of said stand, the swinging brackets C, having perforated cross-bars *c c*, for holding long-handled tools, and staples *d* on their outer vertical bars, for holding short-handled tools, as set forth.

In testimony that I claim the foregoing I have hereunto set my hand, at Milwaukee, in the county of Milwaukee and State of Wisconsin, in the presence of two witnesses.

AUGUST ROESELER.
