54 **Natural lighting fixture.**

57 The fixture has a plurality of groups (2, 3, 4) of transparent panels (6 to 11) disposed, one group following another in alignment in the longitudinal direction, the panels being arched in the transverse direction, each group of panels forming a modular longitudinal portion of the natural lighting fixture. Sectional struts (14, 15) support and surround the groups of panels at the edges and by means of which the groups of panels are located on a base frame (19) comprising edge-supporting longitudinal battens (20, 21) and transverse battens (22, 23). Disposed along each transverse edge of each group of panels is an arcuate one-piece transom sectional strut (14, 15) one (14) of which is provided with a pocket (25) which opens radially outwards and the other (15) of which has a hook extension (27) received in the pocket. Groups of panels (12, 13) are connected at the two ends.
