United States Patent Office.

JOHN STEPHEN, OF WOMELSDORF, PENNSYLVANIA.

Letters Patent No. 67,601, dated August 6, 1867.

IMPROVED PASTRY-CUTTER.

The Schedule referred to in these Letters Patent and making part of the same.

TO ALL WHOM IT MAY CONCERN:

Be it known that I, JOHN STEPHEN, of Womelsdorf, in the county of Berks, and in the State of Pennsylvania, have invented certain new and useful Improvements in Pastry-Cutter and Marker; and do hereby declare that the following is a full, clear, and exact description thereof, reference being had to the accompanying drawings, and to the letters of reference marked thereon.

In the annexed drawings, making part of this specification, A represents a rod, with a fork, B, formed upon one end, and a curved corrugated print, C, upon the other. At suitable distance from the forked end, four arms *a a a a* project from the rod A, said arms projecting from the four sides of the rod. To the outer ends of the arms are secured, first, two corrugated thin wheels D, which are placed at a suitable distance apart, and revolve, and which are used for cutting tart-strips, or strips to go around the edges of pies; second, a single corrugated wheel, E; third, a thick corrugated wheel, F, with a cutter, G, projecting beyond it; and, fourth, a thin, plain cutting-wheel, H. These wheels are so formed as to be capable of not only cutting the pastry, but ornamenting in various styles, according to the taste of the operator.

Having thus fully described my invention, what I claim as new, and desire to secure by Letters Patent, is—

The rod A, provided with fork B and print C upon its ends, and with four arms *a a a a* projecting from its sides, said arms having corrugated wheels D D E F, and cutter G, and plain wheel H, all constructed, arranged, and used as herein set forth.

In testimony that I claim the foregoing I have hereunto set my hand this 12th day of April, 1867.

JNO. STEPHEN.
