(54) Title of the Invention: **Soft button input systems and methods**  
Abstract Title: **Soft button input systems and methods**

(57) Soft button systems and methods are provided. A soft button method can include disposing a machine readable pattern on a substrate and associating a portion of the machine readable pattern with at least one machine executable instruction set selected from a plurality of machine executable instruction sets. The method can, responsive to detecting the portion of the machine readable pattern, execute the at least one selected machine executable instruction set.
