# UNITED STATES PATENT OFFICE.

ERNEST W. CAMPBELL, OF PROVIDENCE, RHODE ISLAND, ASSIGNOR TO  
THE HOLMES & EDWARDS SILVER COMPANY, OF BRIDGEPORT, CON-  
NECTICUT.

## DESIGN FOR A SPOON, &c.

SPECIFICATION forming part of Design No. 25,018, dated December 31, 1895.

Application filed November 21, 1895. Serial No. 569,741. Term of patent 7 years.

*To all whom it may concern:*

Be it known that I, ERNEST W. CAMPBELL, a citizen of the United States, residing at Providence, in the county of Providence and State of Rhode Island, have invented and produced a new and original Design for Spoons, Forks, &c.; and I do declare the following to be a full, clear, and exact description of the same, reference being had to the accompanying drawings, forming a part thereof.

Figure 1 is a plan view of the upper or obverse side of a spoon embodying my novel design, the outlines of a fork appearing in dotted lines; and Fig. 2 is a plan view of the back or reverse side of a spoon embodying my novel design, the outlines of a fork appearing in dotted lines.

The leading features of my novel design consist of the shape and ornamentation of the handle as herein shown and described. The outlines of the edges at the widest portion of the handle are slightly irregular, and the sides of the shank are straight lines. The widest portion of the handle (indicated by 1) is a short distance from the outer end thereof. The general contour of each edge from the widest portion to the tip is a convex curve, as at 2, the lines, however, being slightly irregular. The tip is rounded, as at 3. The

general contour of each edge from the widest 30  
portion toward the shank is an incline, as at  
4, the lines, however, being slightly irregular.  
The sides of the shank are straight lines, as  
5, which incline toward each other slightly  
in the direction of the bowl. On the obverse 35  
side near the widest portion is a plain surface,  
(denoted by 6.) This surface is surrounded,  
and the remaining portion of the handle  
proper is covered by conventional rococo or-  
namentation, (denoted by 7.) Rococo orna- 40  
mentation (indicated by 8) is also provided on  
the shank and where the shank joins the bowl.  
On the reverse side at the center is a plain  
surface, (denoted by 9.) This surface is sur-  
rounded by conventional rococo ornamenta- 45  
tion, (denoted by 10.) The shank is left plain,  
but is slightly ornamented in rococo style, as  
at 11, where the shank joins the bowl.

What I claim is—

The design for a handle for spoons, forks, 50  
and similar articles substantially as shown  
and described.

In testimony whereof I affix my signature  
in presence of two witnesses.

ERNEST W. CAMPBELL.
