(54) Title: METHODS AND REAGENTS FOR MAINTAINING THE VIABILITY OF CANCER CELLS IN SURGICALLY REMOVED TISSUE

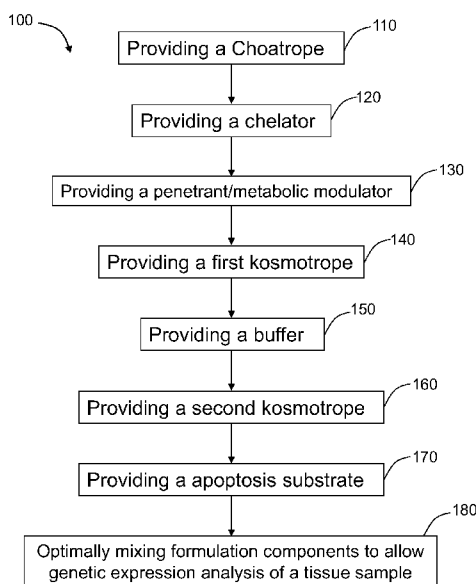

Figure 1

(57) Abstract: A composition and method for generating reagents and the composition of these reagents for the stabilization and preservation of viability of cancer tissue which has been surgically excised and the suspension and/or termination of apoptosis (cell death) by significant modulation of cell metabolism by low molar concentrations of synergistic chemistries and hormonal growth enhancers while maintaining normal gene expression patterns of the surgically excised tissue.
