[57] **CLAIM**

The ornamental design for a microphone mount, as shown and described.

**DESCRIPTION**

FIG. **1** is a perspective view of a microphone mount showing our new design; the broken lines are shown for illustrative purposes only;
FIG. **2** is a front elevation thereof;
FIG. **3** is a rear elevation thereof;
FIG. **4** is a top plan view thereof;
FIG. **5** is a right side elevation thereof;
FIG. **6** is a bottom plan view thereof; and
FIG. **7** is a cross section taken on line **7**—**7** of FIG. **2.**
The appearance of the left side is a mirror image of the appearance of the right side shown in FIG. **5.**
The internal slot behind the U-shaped slot of FIG. **2** is also U-shaped as indicated in FIGS. **4** and **7,** but its U-shaped appearance is not readily perceptible upon observation of the exterior of the MICROPHONE MOUNT, so the U-shape thereof is not considered an important feature of the design.
