(54) **Clamp and support for securing glass to a window opening system**

(57) Clamp for securing the window glass to window opening systems in a automotive vehicle, which may be easily pre-fitted in a bracket-drag plate, which facilitates the installation of this securing clamp to the bracket-drag plate and subsequently fitting the assembly to the window glass. This clamp has a U-shaped structure with a central longitudinal lip adapted to fit a window glass, and on the back plate of the clamp projects at least one hook, so

there is a gap (d) between the outer surface of the back plate and the inner surface of the hook, designed to hold the upper part of an element of the bracket-drag plate. Another object of the invention is the design of a support-drag plate comprising at least one attachment area shift-able and securable in the aforementioned inner space (d).
