(54) Title: BAG IN BOX PACKAGING HAVING A LOCATING PANEL FOR A TAP

Figure 1a

(57) Abstract: A bag in box packaging compris-  
ing an outer box, an inner bag and a locating  
panel. The outer box has a bottom wall and a  
dispensing wall with an opening toward the low-  
er end thereof. The inner bag includes a spout  
with a tap. The locating panel has a front surface  
and a back surface. The locating panel includes a  
central region which is coupled to at least one of  
the inner bag, the spout and the tap, with a dis-  
pensing opening of the tap on one side of the lo-  
cating panel and the bag on the other side of the  
locating panel. An upper region extends above  
the central region and a lower region extends be-  
low the central region. The inner bag is placed  
within the outer box so that the central region of  
the locating panel is positioned at an angle rela-  
tive to each of the bottom wall and the dispen-  
sing wall. In turn, the front surface of the upper  
region overlies an inner surface of the dispensing  
wall. The front surface of the lower region over-  
lies an inner surface of the bottom wall. The bot-  
tom wall, the dispensing wall and the locating  
panel define a tap region within the outer con-  
tainer within which the tap is positioned when in  
a stowed configuration. The tap is accessible  
through the opening in the dispensing wall.

**A. CLASSIFICATION OF SUBJECT MATTER***B65D 77/06(2006.01)i, B65D 33/38(2006.01)i, B65D 5/74(2006.01)i, B31B 7/00(2006.01)i*

According to International Patent Classification (IPC) or to both national classification and IPC

**B. FIELDS SEARCHED**

Minimum documentation searched (classification system followed by classification symbols)

B65D 77/06; B65D 30/16; B65D 33/00; A23L 1/10; A47J 36/28

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Korean utility models and applications for utility models

Japanese utility models and applications for utility models

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

eKOMPASS(KIPO internal) &amp; Keywords: bag, box, package

**C. DOCUMENTS CONSIDERED TO BE RELEVANT**

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
A	JP 2006-304661 A (FUNAYAMA KK et al.) 09 November 2006 See Figure 1 and Detailed Description.	1-15
A	JP 2000-085789 A (HIRANOYA BUSSAN:KK) 28 March 2000 See Figure 12 and Abstract.	1-15
A	US 2008-0267538 A1 (STEPHENSON JOHN) 30 October 2008 See Figures 1A-1D and Abstract.	1-15

 Further documents are listed in the continuation of Box C. See patent family annex.

\* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&amp;" document member of the same patent family
