(54) Title: SYSTEM, APPARATUSES, AND METHOD FOR LINKING AND ADVISING OF NETWORK EVENTS RELATED TO RESOURCE ACCESS

(57) Abstract: The disclosed system, apparatuses, and method can be used to relate network event data generated by different devices in a computer network in order to provide a user with a comprehensive view or report of network activity occurring on a computer network, including the computer, user, network address, and resource involved. This comprehensive view of network activity can be used to prove compliance with applicable policy, law and/or regulation restricting access to a resource such as confidential business information and/or personal information required to be protected. In addition, the comprehensive view of network activity can be used to discover vulnerabilities in the computer network, to monitor ongoing network activity, and to enforce applicable security policy, law and/or regulation to prevent access to a network resource.
