UNITED STATES PATENT OFFICE.

LUCINIUS HAVASY, OF NEW YORK, N. Y.

COMBINED SATCHEL AND MUFF.

SPECIFICATION forming part of Letters Patent No. 284,298, dated September 4, 1883.

Application filed December 18, 1882. (No model.)

To all whom it may concern:

Be it known that I, LUCINIUS HAVASY, of the city, county, and State of New York, have invented a new and useful Improvement in a
5 Combined Satchel and Muff, of which the following is a specification.

The object of my invention is to provide a combined satchel and muff which shall be adapted for use during the summer as well as
10 winter weather, and this I do by making the muff detachable from the satchel. The advantages of this arrangement are that the same satchel may be made to answer for all seasons, while the muff attachment is reserved for use
15 during its proper season.

My invention is more clearly shown in the annexed drawings, in which—

Figure 1 shows a satchel, A, with a detachable muff attachment, B, secured to the same
20 by fastenings at one side. Fig. 2 shows the same closed and secured at both sides.

The muff attachment and satchel may be secured together, as shown, by two series of eye-
25 let-holes, *aa* and *bb*, respectively placed in the satchel and muff, through which may be

passed a cord, which, for ornamental effect, may be of handsome material provided with tassels, &c.; or the same may be secured by clasps, hooks and eyes, or by any usual device.

The muff attachment may be of hair, fur, 30 or any usual material, and the whole may be carried by a handle or supported from a belt, or in any usual way.

My invention comprehends a satchel with a detachable muff attachment on either or both
35 sides, according to the preference of the wearer.

I am aware that the combination of a satchel and muff is not a novelty.

Having fully described my invention, what 40 I claim is—

In a combined satchel and muff, the combination, with the bag or satchel, of the detachable portion, the two parts relatively arranged substantially as shown, for the purpose de- 45 scribed.

LUCINIUS HAVASY.
