Title: INTRAHEMICAL TERTIARY HEALTH CARE SYSTEM

Abstract: Intravehicular tertiary health care system (10) for patients, requiring specialised medical procedures, including pre-invasive investigation and corrective surgical interventions. The system comprises a hyperbaric prefabricated modular suite for composite diagnostic and correction surgery, equipped for digital imaging and intensification; one pre and post operation antechamber; and one personnel wash and growing vestibule; wherein a web-enabled cyber-connected remote monitoring station is installed. The sensitive system is dynamically stabilised by multiple-stage pneumatic hydraulic impact-isolators that attenuate the effect of severe shocks; that are monitored by a plurality of 3-axis accelerometers.
### INTERNATIONAL SEARCH REPORT

### B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

U.S.: 296/24.1

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

### C. DOCUMENTS CONSIDERED TO BE RELEVANT

- **Special categories of cited documents:**
  - "A" document defining the general state of the art which is not considered to be of particular relevance
  - "E" earlier application or patent published on or after the international filing date
  - "L" document which may throw doubts on priority claim(s) or which is cited to establish thepublication date of another citation or other special reason (as specified)
  - "O" document referring to an oral disclosure, use, exhibition or other means
  - "P" document published prior to the international filing date but later than the priority date claimed
  - "X" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
  - "Y" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
  - "Z" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is considered with one or more other such documents, such combination being obvious to a person skilled in the art
  - "&" document member of the same patent family
