(54) **Yarn winding device**

(57) A yarn winding device forms a wound package 10 by winding a running yarn Y onto a bobbin 9 attached to a bobbin holder, while traversing the yarn Y in traversing directions by the traverse unit 6. This traverse unit 6 has traverse guides 21 which sandwich the running yarn

Y and reciprocate in the axial directions of the bobbin holder 5. Between a fulcrum guide 19 of the traverse unit 6 and a traverse guide 21, a yarn stitching restraining guide 50 is provided to contact the yarn Y traversed by the traverse guide 21, when the traverse guide 21 is reversed.

ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.

EP 11 18 9514

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
