(54) **Device and method for water-draining connection of a window to a wall, and such assembly**

(57) The present invention relates to a device for water-draining connection of a window frame to a first wall, comprising a first substantially stiff body which is suitable for extending in standing position at least along the first wall over substantially the whole width of the window frame, and a second substantially stiff body which connects watertightly to the first body and which is suitable for extending in lying position over substantially the whole

width of the window frame into a second wall located opposite the first wall.

The invention also relates to an assembly of a cavity wall and a device for water-draining connection to a cavity inner leaf of a window frame arranged in a cavity outer leaf, and to a method for water-draining connection to a cavity inner leaf of a window frame arranged in a cavity outer leaf.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 08 07 5542

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
