(54) Title: IDENTIFICATION SYSTEM AND METHOD OF OPERATION THEREOF

(57) Abstract: An identification system comprises an issuing facility operable to issue a unique identification token to an information content provider wishing to utilise the identification system, and an application facility configurable to contain information content in accordance with a desired use of the issued identification content provider. The identification system includes a register of issued identification tokens, and an access channel providing public access to the configured information content as a function of the issued unique identification token.
