(54) **Title:** COMPUTER GAMING DEVICE AND METHOD FOR COMPUTER GAMING

(57) **Abstract:** A system for computer gaming includes a processor configured to provide a first table of a first group of players grouped together to play a first hand and provide to each of the first group of players one or more cards for the first hand. The system includes an interface couple to the processor and configured to receive from a first player of the first group of players a request to fold the one or more cards of the first player. The processor is also configured to automatically move the first player to a second table of a second group of players grouped together to play a second hand.
