(54) Title: SYSTEM AND METHOD FOR MONITORING SECURITY SYSTEMS

(57) Abstract: A system for monitoring security systems including at least one pedestal set; a reason code generator; a computer to compile data received from the at least one pedestal set, and a graphical display to display the compiled data received from the pedestal set in the form of a maps of locations. An IP camera configured to operate for a period of time during the alarm event may be included. A method for monitoring security systems is also provided which includes providing at least one pedestal set, passing a tag through the pedestal set to create an event, generating a reason for the event observed by the pedestal set, compiling batches of data received from the at least one pedestal set; and graphically displaying the compiled data received from the pedestal set in the form of a maps of locations.

INTERNATIONAL SEARCH REPORT

International application No
PCT/US2005/046088

A. CLASSIFICATION OF SUBJECT MATTER

INV. G08B13/24

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
G08B

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, PAJ, WPI Data

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	US 5 151 684 A (JOHNSEN ET AL) 29 September 1992 (1992-09-29)	1, 3-5, 9, 13, 15, 16, 18, 20, 23-26, 28, 30
Y	column 2, line 67 - column 3, line 2 column 3, lines 40-57 column 4, lines 39-44 column 5, line 62 - column 6, line 19 column 10, line 61 - column 11, line 19 column 11, lines 4-402 ----- -/--	2, 6, 8, 14, 17, 21, 27, 29

☒ Further documents are listed in the continuation of Box C.

☒ See patent family annex.

* Special categories of cited documents:

A document defining the general state of the art which is not considered to be of particular relevance

E earlier document but published on or after the international filing date

L document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

O document referring to an oral disclosure, use, exhibition or other means

P document published prior to the international filing date but later than the priority date claimed

T later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

X document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

Y document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

INTERNATIONAL SEARCH REPORT

International application No.
PCT/US2005/046088

Box II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☐ Claims Nos.:
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

see additional sheet

1. ☐ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☒ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

see annex

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-9,13-30

Relates to a security system having a map and pedestal type antennas and a computer system for monitoring data from the antennas and displaying it on a map. It also includes this system with a camera which is triggered by the pedestal antennas. In this invention the map data and camera data are treated separately.

2. claims: 10,11,12

Relates to a security system having a map and pedestal type antennas and a computer system for monitoring data from the antennas and displaying it on a map. This system additionally includes a camera which is triggered by the pedestal antennas. In this invention the camera data (video data) is received from a pedestal set. Antenna data and the video data are compiled together and the compiled data is displayed in a map.
