(54) Title: SYSTEMS AND METHODS FOR PROVIDING A DIGITAL IMAGE AND DISPOSITION OF A DELIVERED GOOD

(57) Abstract: Systems and methods are disclosed for determining the disposition of a shipped good, such as a car, damaged during transit. After the damage is detected, a digital image of the is obtained. The image is uploaded to a server typically along with the vehicle identification number and/or other identification data. The server determines the appropriate individual(s) to be contacted, and generates a notification message, typically including the URL of a web site where further information can be obtained. The appropriate individual ("user") logs onto the server to view the digital images and provides input regarding the disposition of the good. The user may direct the damaged car to a repair shop, a dealer, or another destination. Alternatively, the user may indicate delivery of the car as originally planned. The server may notify other systems of the disposition as well. Other embodiments apply to the disposition of delivered packages.
