UNITED STATES PATENT OFFICE.

MOSES K. BORTREE, OF JACKSON, MICHIGAN.

IMPROVEMENT IN CORSET-BOXES.

Specification forming part of Letters Patent No. **161,741**, dated April 6, 1875; application filed February 12, 1875.

To all whom it may concern:

Be it known that I, MOSES K. BORTREE, of Jackson, in the county of Jackson and State of Michigan, have invented an Improved Corset-Box, of which the following is a specification:

My invention has for its object to furnish a neat and convenient box, approximating in cross-section the form of a corset, when it is rolled up, for containing the latter, while the ends of the cover will cover the entire ends of the box, as more fully hereinafter set forth.

Figure 1 is a perspective view of the box closed. Fig. 2 is a cross-section at *x x*. Fig. 3 is a perspective view of the two parts of the box separated.

In the drawing, A represents a five-sided oblong paper box, closed at the ends *a*. A' is a five-sided oblong cover for the box A, over which its lower parallel sides slide, the box

and cover forming an octagonal receptacle for a corset when rolled up and placed in it. The ends *a'* of the cover are octagonal pieces, which overlap the ends *a* of the part A, not only increasing the strength of the box at the ends, but affording an opportunity for affixing a label of the full size of the end of the box, which label is not destroyed by opening the box.

If desired, the box and cover may be connected by tapes to hinge them together.

What I claim as my invention, and desire to secure by Letters Patent, is—

The herein-described corset-case, consisting of the box A and cover A', the latter having octagonal end pieces *a'*, substantially as shown and set forth.

MOSES K. BORTREE.
