Title: BACK REST DEVICE FOR A WEAVING MACHINE

Abstract: Weaving machine, method and back rest device for guiding warp threads (7) coming from a warp beam (10) comprising a first guiding bar (3), a mounting device (4), a second guiding bar(5, 105), which in use is arranged in parallel to the first guiding bar (3) and upstream of the first guiding bar (3) for deflecting warp threads (7) coming from the warp beam (10), and a supporting device (6), which for supporting the second guiding bar (5, 105) is arranged in use at least substantially fixed in position with respect to the longitudinal axis of the first guiding bar (3).

## A. Classification of Subject Matter

INV. D03D49/22

ADD.

According to International Patent Classification (IPC) or to both national classification and IPC.

## B. Fields Searched

Minimum documentation searched (classification system followed by classification symbols)

D03D

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched.

## C. Documents Considered to Be Relevant

Further documents are listed in the continuation of Box C.

See patent family annex.

* Special categories of cited documents:

  * "A" document defining the general state of the art which is not considered to be of particular relevance.
  * "E" earlier application or patent but published on or after the international filing date.
  * "L" document which may throw doubts on priority claim(s) one of which is cited to establish the publication date of another citation or other special reason (as specified).
  * "O" document referring to an oral disclosure, use, exhibition or other means.
  * "P" document published prior to the international filing date but later than the priority date claimed.

"X" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention.

"T" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone.

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"A" document member of the same patent family.

### Date of the actual completion of the international search

25 February 2015

### Date of mailing of the international search report

19/03/2015
